🪪 PROFILE

Experienced software developer proficient in both frontend and backend technologies. Adept at creating scalable solutions, troubleshooting issues, and proficient in multiple programming languages. Committed to delivering high-quality and innovative software development

---

💼 PROFESSIONAL EXPERIENCE

12/2022 – present
Pune

Quadwave consulting Pvt. Ltd
Solutions Developer

-Developed and maintained responsive web applications using frontend technologies, ensuring cross-browser compatibility and an optimal user experience.
-Collaborated with the team to resolve problems and streamline the deployment process
-Delivering high-quality code, maintaining an efficient project life cycle, and achieving improvements in the development life cycle

---

🎓 EDUCATION

2019 – 2022
Pune

BBA(ca)
Pune university

2017 – 2019
Pune

HSC
Pratibha collage of Commerce and Computer Study Chinchwad Pune

---

🧠 SKILLS

Languages
HTML, CSS, JavaScript, Bootstrap, jQuery, React ,Java

IDE/Tools
Visual Studio Code, Eclipse Luna, Netbeans, STS, Mysql Workbench

Frameworks
Angular, Spring, Spring Boot

Version Control
GIT, Azure DevOps

Databases
MySql, Sql, Firebase

Library
Angular :-   SyncFusion, ngx-bootstrap,Angular Material UI

📁 PROJECTS

1. Econsys V5

Project summary: Econsys is a cloud-based SaaS platform focused on governance in commercial management. With built-in automated risk management and compliance features, it streamlines decision-making and policy enforcement. The platform's user-friendly design enhances accessibility, fostering efficient collaboration. Econsys stands as a versatile solution for organizations navigating complex regulatory landscapes, providing a unified hub for automation and adherence to industry standards.

Roles and Responsibility in the project:

Developed and maintained web applications using Angular, ensuring high
* performance and responsiveness.
* Providing design inputs & work on POCs for new features.
* Ensuring cross-browser compatibility
Integrated RESTful APIs to fetch and update data, enhancing application
* functionality.
Collaborated with QA teams to identify and resolve bugs, ensuring the delivery of
* high-quality software

2. Chat Application

A chat application built using React and Firebase, enabling real-time messaging. Firebase handles data storage and synchronization, while react provides a dynamic and user-friendly front-end interface. Users can exchange messages seamlessly and securely

Roles and Responsibility in the project:

Implement continuous integration and deployment processes.
Coordinate with frontend and backend teams for version control.
Document code, configurations, and deployment procedures.
Create and maintain project documentation, including API documentation and user manuals.

3. User Management CRUD Application

The User Management CRUD (Create, Read, Update, Delete) Application is a user-friendly and easy-to-use system built to efficiently manage user information. With robust validation mechanisms and seamless database connectivity, this application ensures accurate data handling and secure operations. Leveraging Axios API, the application seamlessly connects to the Spring Boot backend, facilitating smooth data retrieval and manipulation processes

Roles and Responsibility in the project:

Design and implement the user interface for the CRUD application.
Implement user-friendly forms for adding, updating, and deleting user information.
Integrate validation mechanisms to ensure data accuracy.
Collaborate with the backend team for seamless Axios API integration.
